

digitalmatatus

**Towards an Open and Collaborative Digital Platform to improve
African Urban Public Transport**

Adam White, Dan Orwa, Jacqueline Klopp, Peter Waiganjo Sarah Williams
Paris, Nov. 9th 2017

Agenda

- Quick overview of why semi-formal mapping/data collection matters
- Mapping Nairobi paratransit - Digital Matatus
- Applications/Impacts of data
- Challenges
- Opportunities moving forward

Semi-formal bus systems-mass transit for most of Africa and elsewhere

Matatu -Nairobi

Jeepney - Manila

Dhaka

Taxi - West Africa

Colectivo – Mexico City

Manical – Panama City

Lima

Marshrutkas - Russia

Tap, Tap - Haiti

Daladala – Dar Salaam

Dolmuş in Bodrum, Turkey

Urban Sustainable Development Goal

GOAL 11

MAKE CITIES AND HUMAN SETTLEMENTS INCLUSIVE,
SAFE, RESILIENT AND SUSTAINABLE

SUSTAINABLE DEVELOPMENT GOALS

More at sustainabledevelopment.un.org/sdgsproposal

SDG Subtarget 11.2

- By 2030, provide access to safe, affordable, accessible and sustainable transport systems for all, improving road safety, notably by expanding public transport, with special attention to the needs of those in vulnerable situations, women, children, persons with disabilities and older persons.

Improve Public Transport for Equity, Health, Sustainability

3.5 MILLION PEOPLE
DEPEND ON NAIROBI'S 130 MATATU ROUTES

Semi-formal Bus Systems Lack Data!

- Few or no
Maps/Passenger
Information/Apps/Data
- Few planning tools
- No modelling and
understanding of
dynamics for better
interventions
- Monitoring USDG 11?

These minibus systems are often
invisible in planning for African cities

Thika Highway

Policy Invisibility has implications

Many transportation projects in Africa ignore existing public transport

Making them more likely to be private car oriented- hence less green and more exclusive, less likely to achieve USDG 11

Metro Nairobi Vision 2030

How to get data?

NATURE OF CELL PHONE USE IN NAIROBI, KENYA TO CAPTURE DATA ABOUT THE INFORMAL TRANSIT SYSTEM, WHICH MOST CITIZENS DEPEND UPON, AND OPEN THAT DATA UP FOR ANYONE TO USE AND BUILD UPON.

Leverage Growing Cellphone Use to Collect Missing Transit Data

DIY DATA

Digitization

The Local Government Act

(Cap. 265)

IT IS NOTIFIED for general information that the City Council of Nairobi has amended its omnibus By-law to provide for the following routes and designated parking for omnibus-

TERMINUS	ROUTE	DESTINATION	ROUTE DESCRIPTION
Circular	CBD Shuttle A	Circular within CBD	Muthurwa- Globe Cinema Roundabout (via Haile Selassie Avenue-Moi Avenue-Muranga Road) Community (via Tom Mboya Street - Cabral Street - Moi Avenue - Kenyatta Avenue-Ngong Road) and back to Muthurwa (via Ngong Road - Haile Selassie Avenue)
Circular	CBD Shuttle B	Circular within CBD	Muthurwa - Community (via Haile Selassie Avenue and Ngong road) Globe Cinema Roundabout (via Ngong Road - Kenyatta Avenue - Moi Avenue- Muranga Road) and back to Muthurwa (via Tom Mboya Street - Moi Avenue - Haile Selassie Avenue)
Muthurwa	19-C	Komarock	Komarock Estate - Kangundo Road - Outer Ring Road - Jogoo Road Muthurwa
Muthurwa	19-60	Kayole	Kayole Estate- Kangundo Road - Outer Ring Road- Jogoo Road Muthurwa
Muthurwa	19-61	Kayole	Kayole Estate- Kangundo Road- Outer Ring Road- Jogoo Road Muthurwa

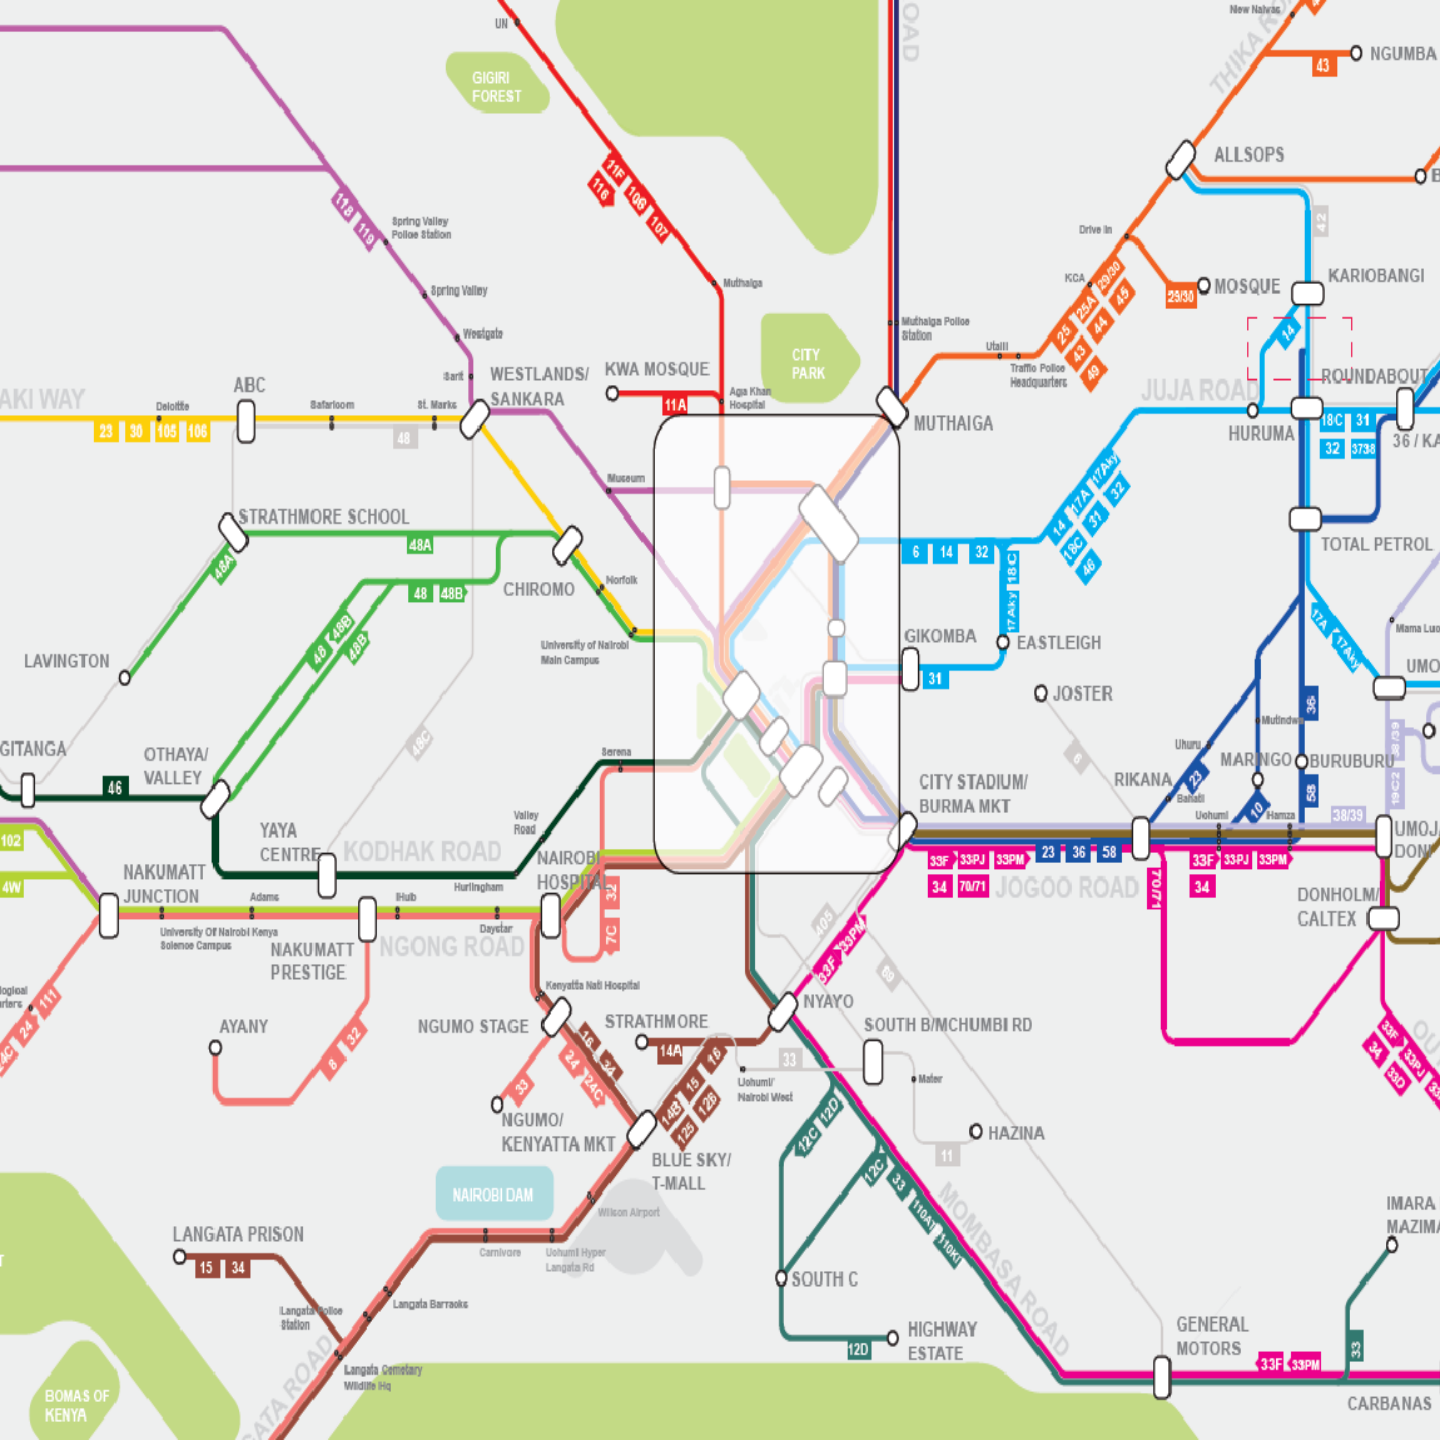

GTFS Data Standard

Sample Data

WESTLANDS – KIKUYU SECTION ROUTE # 105

Label	Description	Latitude	Longitude	Type of Stop
1	Westlands	-1.2628	36.80031	D
2	St. Marks	-1.26132	36.79749	D
3	Lions Place	-1.26109	36.79608	U
4	Brookside	-1.26075	36.79245	U
5	AACC/Safaricom/Church Road	-1.25982	36.78687	D
6	Aga Khan High School	-1.25934	36.78281	D
7	ABC Place Stage	-1.25897	36.7786	D
8	ABC Place Entrance	-1.25919	36.77746	U
9	James Gichuru Junction	-1.25946	36.77551	U
10	KARI	-1.25974	36.77392	D
11	Nairobi School	-1.26035	36.77108	D
12	Deloitte	-1.26309	36.76439	U
13	AFRALTI	-1.26366	36.7613	D
14	Kianda School	-1.26395	36.75863	U
15	Sodom	-1.26425	36.75426	D
16	Kangemi Market	-1.26429	36.74858	U
17	Sugarboard/Shell	-1.26454	36.74197	U

digital matatus

Collected 136 bus
routes, most
stops and 6 rail
routes for Nairobi

First open GTFS
data sets for
mini-bus systems
in an African city

Technical Challenges

- Sustainable and routine data collection due to dynamic nature of cities where semi-informal transit occurs: tools, business models?
- Gaps in completeness of the transit data – schedules, fares, safety, capacity, transit indicators, revenues, taxes,...
- Addressing Complex Intermodality
- Analysis with other data layers (network improvements, improving accessibility)
- Transferability to new cities and scaling

Opportunity: innovating with tools and institutions for updating data

Opportunity: Exploring Crowdsourcing

- Developed user-friendly, easy to use, low cost updating tools for GTFS data to enhance scalability and sharing across cities
- Investigate sustainable methods for updating the data
 - Crowdsourcing and Flocksourcing

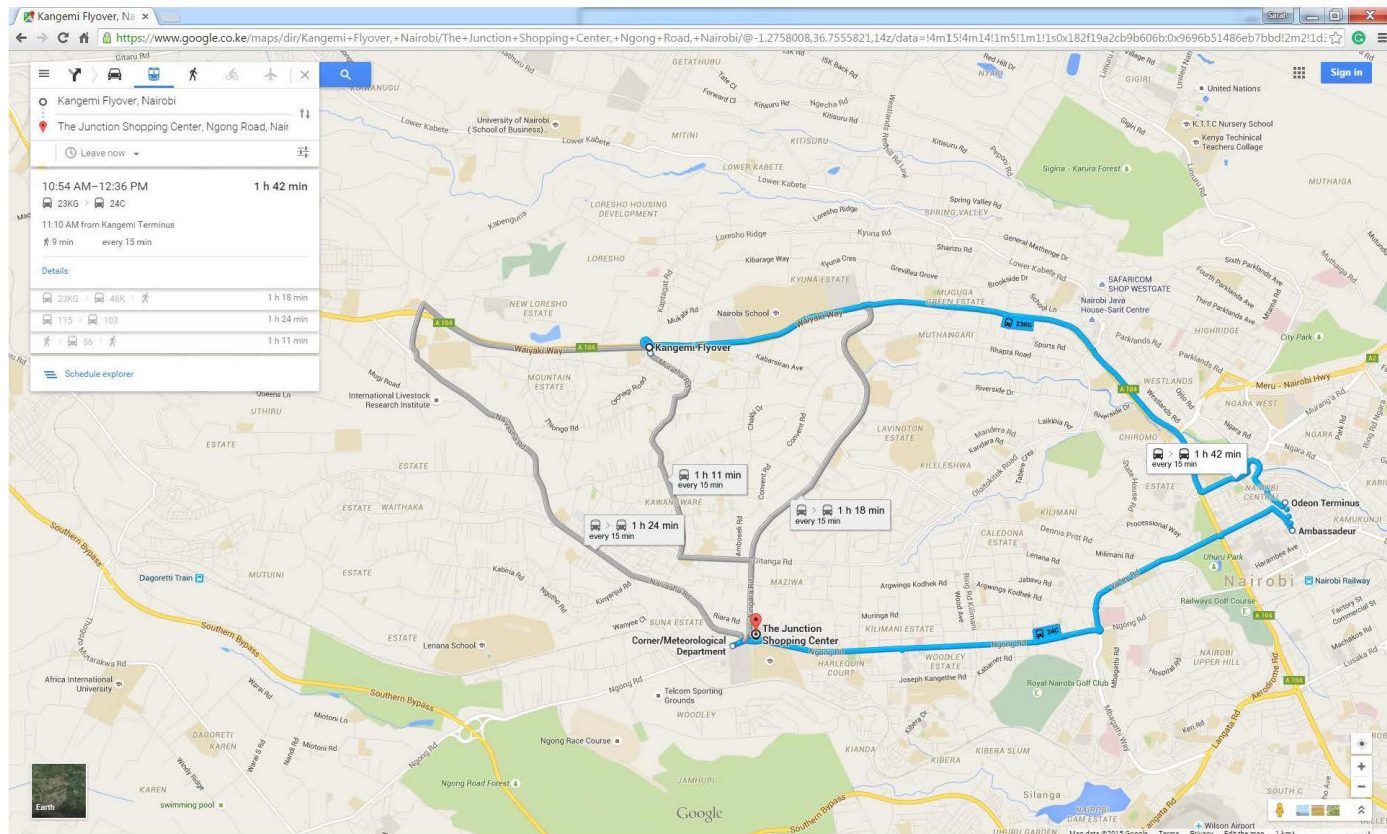

APP to track and manage matatu fare expenditure

Crowdsourcing APP for route updates from commuters, driver,...that use the system frequently

GROUPSHOT

Policy Challenges

- **Open data**; sharing of data; data as a regulator requirement? Digital ethics?
- Which **forms of passenger information** (including non-digital) most effective for different cities, cultures, groups especially the poor?
- **Impacts** of more information (Shaheen et al 2017)?
- How to create **open transport data portals** and institutional systems to support data updating, innovation, harmonization and accountability?
- **Mainstream collaborative mapping** into transport infrastructure planning and finance across the globe

Resource Center For Mapping Public Transport with Informality

Provide tools and services to develop data on public transport systems (specializing in semi-formal systems) and perform this work so it has the greatest benefits for local communities

**DATA
COLLECTION
TOOLS**

**GTFS PRODUCTION
TOOLS**

**VISUALIZATION /
POLICY OUTREACH STRATEGIES**

**STRATEGIC PARTNERSHIPS/
POLICY INITIATIVES**

This means that data collection will be done collaboratively with local actors including the transport and technology community, the data collected will be open, and a wide variety of local actors will be engaged in the work to sustain and institutionalize it within the city or region being mapping.
